

Forest Carbon Partners

Forest Carbon Partners finances and develops forest carbon offset projects for the California carbon market. We work with family, industrial and tribal landowners to create carbon offset projects that deliver real value – increasing and diversifying revenue for timberland owners. Our work delivers a reliable, high-volume supply of offsets to businesses regulated under the California cap and trade system.

Forest Carbon Partners is an investment fund managed by New Forests.

Credit Sales

Forest Carbon Partners delivers a reliable, high-volume supply of ARB-compliant offsets to businesses regulated under the California cap and trade system. New Forests funds, including Forest Carbon Partners, have sold 1.3 million forest carbon offsets into the California compliance market to date.

We can offer ARB offset credits in small and large lots via forward contracts. We can also offer spot credit sales commencing in late 2013. We structure offset sales to meet a wide range of compliance needs, and we are experienced in rapidly meeting the due diligence requirements of California compliance offset purchasers.

Our aggregated portfolio of projects reduces delivery risk and provides a single point of contact for offset purchase and sales contracting.

Project Development

Forest Carbon Partners finances and develops projects located anywhere in the United States at no cost to the landowner.

We pay for the cost of offset project development on a landowner's property and manages project development and credit sales. In exchange for our services, we charge a minority percentage of credit sales revenue from the project for a limited period of time.

We have worked in the past with family forest owners, industrial landowners, Native American tribes, hunting clubs, and land trusts.

Our Team

David Brand,
Managing Director

Dr. Brand has over 30 years of experience in forest management, investment management, science, public policy, public administration and international affairs. He is the founder of New Forests. Previously, he was director of the New Forests Program with Hancock Natural Resource Group (HNRG) and was responsible for the design and oversight of investment programs that integrated timber management with emerging environmental market opportunities. David holds a PhD from the University of British Columbia and a BS in Forestry from the University of Toronto in Canada.

James Davies,
Head of Funds Management

Mr. Davies has over 20 years of investment management experience across debt, equity, hybrid, and derivative instruments in private equity, debt capital, bank, OTC, and listed equity markets. He is responsible for overseeing product development, marketing, and management of New Forests' funds and investment products globally. He oversees offset credit sales for Forest Carbon Partners. James has an MBA from London Business School and a BS from the University of New England in Australia.

Brian Shillinglaw,
Manager of Carbon Investments and Policy

Mr. Shillinglaw manages Forest Carbon Partners' investment activities, including forest carbon project origination, offset project development, and offset credit sales. He also oversees New Forests' US carbon policy activities, with an emphasis on advocacy and analysis of forest carbon protocols and climate legislation in the United States. Brian holds an AB from Harvard University and a JD and MS from Stanford University.

Tim Robards,
Manager of Forestry and Carbon Science

Dr. Robards manages forestry and carbon analytics for New Forests' carbon and timberland investments in the US. Tim provides quantitative oversight of forest carbon projects in the assessment, project development and operational phases. He has over 25 years of experience as a forester and forest biometrician and is a California Registered Professional Forester and a Society of American Foresters Certified Forester. Tim was quantitative lead on the Climate Action Reserve forest protocol, which was the model for the California compliance protocol adopted by the Air Resources Board. Tim holds a BSF in Forest Management from Purdue University and a MS and PhD with a focus on Forest Biometrics and Climate Change from the University of California, Berkeley.

David Brentlinger,
Director of Investments and Operations

Mr. Brentlinger directs New Forests' US investment business. He is responsible for overseeing and developing fund and investment products focused on environmental markets. David has over twenty years of experience in real estate investing, development, asset management and planning. Prior to joining New Forests, he served as Senior Vice President of Weyerhaeuser Realty Investors, a fund manager and provider of real estate project debt and equity across the US. David holds an MBA from the University of Chicago, an MA from Columbia University and a BA from Stanford University.

Suzanne Kim,
Manager of Investment Analysis

Ms. Kim manages analysis of New Forests' current and prospective investments in the United States, including those for Forest Carbon Partners. Suzanne has 15 years of experience in investment analysis, architecture, public policy, real estate, and renewable energy. Previously, she worked as an analyst for Credit Suisse and for Kensington Investment Group, focusing on REIT, real estate, and infrastructure investments. Suzanne holds an AB from Dartmouth College and a dual MPP/UP and a MArch from Harvard University. She is a CFA charterholder.
